

NOTES:

1. Compressive strength of Reinforcement System shall exceed H20 loading requirements.
2. Soil infill will be based on local conditions and be determined by the Engineer.
3. Base material thickness and type shall be provided by the Manufacturer.
4. Geotextile fabric is required to prevent migration of fines into the subgrade.
5. For design purposes, the void space in the reinforced grass parking system will receive 50 percent credit for required treatment volume.
